

SafeZone Protect PinDown

Mobile Anti-Terrorism Barrier

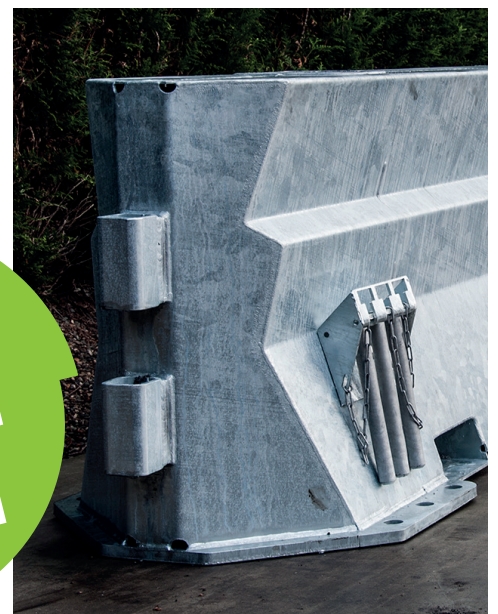

ASTM F2656/F2656M tested

The threat of terrorism is ever increasing and a better protection of people and properties is needed. SafeZone Protect PinDown is developed to prevent vehicle intrusions into areas that need to be temporarily protected.

SafeZone Protect PinDown is a mobile barrier that is designed for rapid deployment and removal. SafeZone Protect PinDown can be combined with variable angle pieces and gates for pedestrian passing. It is made from high quality S355 steel and is reinforced with high strength steels. SafeZone Protect PinDown delivers maximum protection and is easy to move and install with only 2 persons.

**F2656/
F2656M
Tested**

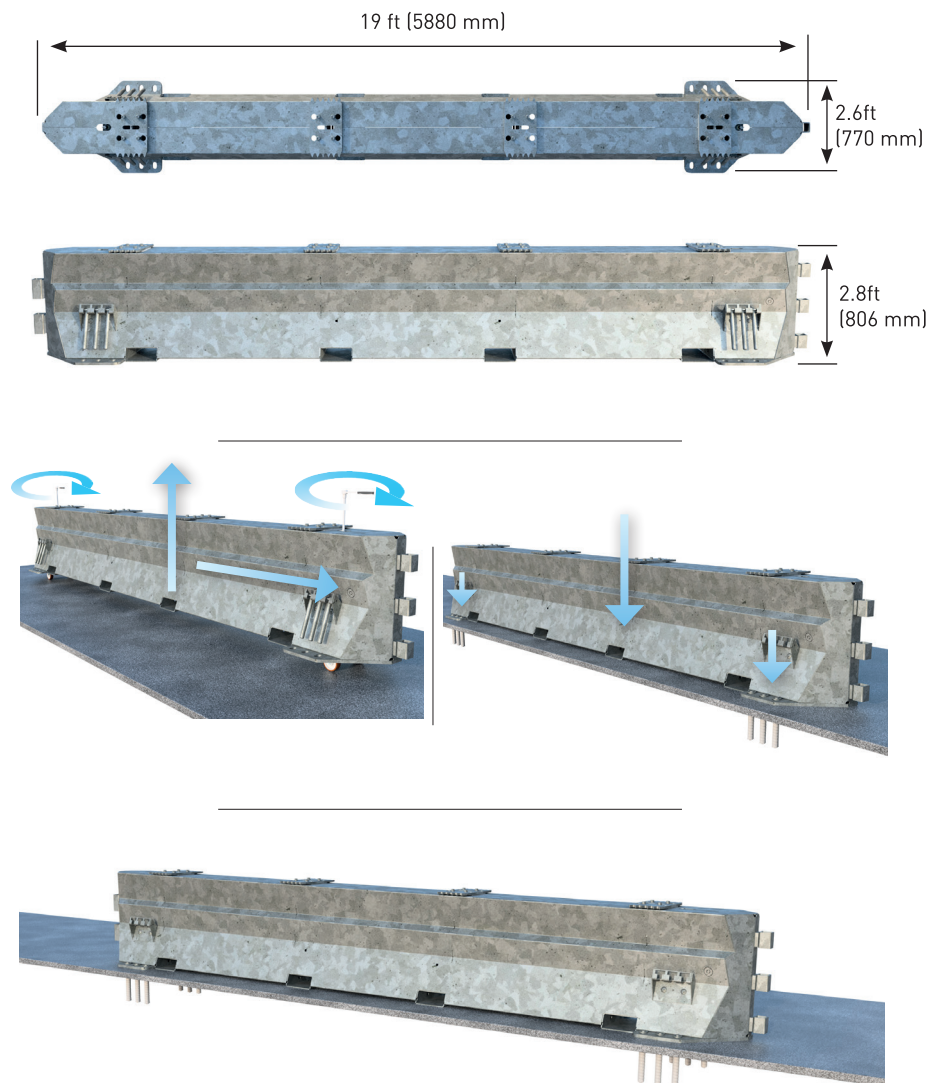

SafeZone Protect PinDown comes in pre-assembled low weight 19ft. (5880 mm) sections. The height of the barrier is approximately 2'8" (806 mm). SafeZone Protect PinDown has a built-in wheel section for easy transportation and fast deployment.

The SafeZone Protect PinDown is very easy to install and remove because of the wheel sections and pins. Simply lower the wheels and the barrier can be moved by only 2 persons. Move the barrier in place, lower the barrier and insert the pins in the pre-drilled holes. After the event simply remove the pins, lift the barrier and store the barrier. SafeZone PinDown is the best choice to secure your event fast and easy.

Because of the use of high quality S355 steel reinforced with high strength steel the barrier is capable of high impacts.

Advantages of the SafeZone Protect PinDown:

- + ASTM F2656/F2656M tested
- + mobile steel anti-terrorism barrier
- + available in 19ft, 14ft and 9ft
- + easy to move by 2 persons
